Bela Crkva is located in the beautiful and spacious valley of the Nera river, in the extreme southeast of Vojvodina. It is bordered by the branches of the Carpathian Mountains, and open to the west towards the Pannonian Plain. It is less than 100 kilometers from Belgrade. In the immediate vicinity of the city are the waterways of the Danube, the Nera, the Karaš, the Danube-Tisa-Danube Canal, as well as several crystal-clear lakes, so the Bela Crkva is also called "the Venice of Vojvodina".

In the small town that got its name from the old church that the first settlers came across, it's as if time has stopped. The peace and plains of Vojvodina, combined with old historic buildings with baroque facades, beautifully landscaped parks and thousands of different types of flowers, give the impression that you have gone back a century or two.

Clean and fresh air gives an additional contribution to that impression, because there is no industrial plant in Bela Crkva, and the excellent geographical position, where the riches of fertile land and lush vegetation intertwine, makes this place unique and very attractive for many tourists.

Bela Crkva is known by other names in other languages. Hungarian: Fehértemplom, German: Weisskirchen, Czech: Bilo Cerkva, Romanian: Biserica Alba.

The area of the town of Bela Crkva was inhabited since prehistoric times, the remains of a former settlement were excavated near Siglova's brick factory, and near Dudara, an urn grave from the Bronze Age.

The current Bela Crkva was founded by Count Claudius Florimund de Mercy in 1717. For the sake of security from the Turks and their renewed invasion, Austria formed a military border.

Due to increasingly successful economic development, Bela Crkva received the status of a city in 1815, and it received the status of a free royal city with certain privileges on June 8, 1871, after the abolition of the Military Border. In 1876, there were five silk factories in Bela Crkva, brick and tile factories, cognac and liquor factories, steam lathes, food products, leather factories, mill industry, gravel dredging yard, three soda water factories, printing works and artificial horticulture. Floriculture was developed. At the beginning of the 20th century, over ten thousand vineyards were planted near the city, and 50 to 60 thousand hectoliters of wine were produced.

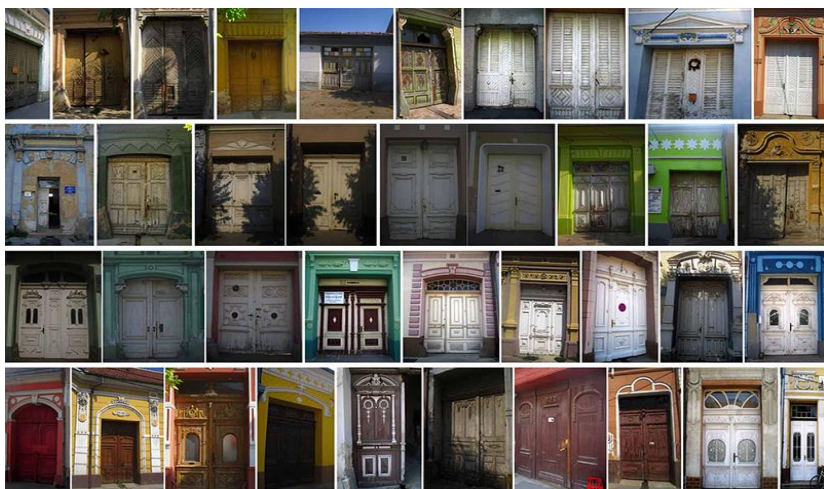

After 1919, Bela Crkva lost its strategic importance. After the demarcation between the Kingdom of SHS and Romania, Bela Crkva remained on the border itself, many roads were closed, it lost its big markets, especially in Austria. With the arrival of the Russian, entire Russian schools were transferred to these areas, especially the Cadet Russian Corps (Prince Konstantin Konstantinovich) and then cultural life reached new heights. During World War II, Bela Crkva was liberated on October 1. In 1944, almost all Germans and natives left the city. Their property was distributed to the winners, mostly colonists from Crna Trava, Montenegro, Bosnia and Herzegovina, Lika and Kordun. Then most of the vineyards were cleared, and today viticulture is only a secondary branch of the economy.

The most significant buildings were created at the end of the 18th century, and were built in the Baroque style. Among the Baroque buildings, the most significant are the Roman Catholic and Orthodox churches, the municipal building, the army home, the fire station and other buildings. The main physiognomy of the city is given by the buildings built and reconstructed in the Viennese Art Nouveau style, so that Bela Crkva is characteristic.

However, what the "Vojvodina Venice" is most famous for are the beautiful artificial lakes, created by digging gravel from the bottom of the Pannonian Sea. This unique experience of swimming, sunbathing, resting and having fun on

crystal clear lakes surrounded by the greenery of the Banat plains is an experience you will surely remember. The complex of Bela Crkva Lakes consists of five larger lakes: Main Lake, Vračevgajsko Lake, Saran Lake, Shljunkara and Novo Lake, as well as three smaller ones: Jugopetrol Lake, Malo Lake and Barutana Lake, and another one is in the making. This unique complex attracts every year an increasing number of tourists who enjoy the beautifully decorated beaches, water sports and swimming in the summer days.

A well-known manifestation in this city is the Carnival of Flowers, which is traditionally organized in the last week of June for seven days, you will enjoy literary evenings, art exhibitions, entertainment and dance evenings on stage, sports and culinary competitions, concerts and of course good atmosphere and

music.

If you want to walk in one of the last deserts in Europe, the Deliblatska Pampa is the place for you. Here you can get acquainted with rare plant and animal species, enjoy hunting and the beauty of this area, which has been declared a special nature reserve due to its unique ecosystem and diverse flora and fauna.

## ANTI-DOPING INFORMATION - TUE REQUESTS

The athletes participating in the Championship, with the registration, implicitly accept all WADA anti-doping rules.

Athlete whose illness or condition requires treatment with a prohibited substance or method must apply to CIPS for a Therapeutic Use Exemption (TUE) following the CIPS strict TUE application process.

He/she shall then use the application form, which can be downloaded from the ITA website: [https://ita.sport/uploads/2021/02/ITA\\_TUE\\_Form.pdf](https://ita.sport/uploads/2021/02/ITA_TUE_Form.pdf)

**The TUE request has to be sent to the following address: [tue@ita.sport](mailto:tue@ita.sport)**

Athletes must therefore consult the Prohibited List [https://www.wada-ama.org/sites/default/files/2022-09/2023list\\_en\\_final\\_9\\_september\\_2022.pdf](https://www.wada-ama.org/sites/default/files/2022-09/2023list_en_final_9_september_2022.pdf)

If the TUE is granted, the athlete will then be permitted to use the medication during the period of validity of the TUE without committing an Anti-Doping Rules Violation (ADRV).

Regardless of whether a TUE has been granted or not, athletes should always declare on the doping control forms filled out during sample collection any medications and supplements taken within the seven days prior to sample collection, and any blood transfusions in the three months prior for blood samples.

If a TUE has already been granted by a NADO or by a RADO, the Athlete in question does not have to apply for any additional CIPS TUE, as CIPS recognizes all TUE granted by NADOs and RADOs.

## COVID REGULATIONS

During any FIPSeD championship scheduled in calendar, the COVID-19 regulations in force in the event hosting Nation are applied.

Any National delegation, teams, club, individual, are invited to inquire about any possible restrictions before leaving from their Country of origin.
